

Be Original

Apparently, writing is difficult. Moreover when we must write something we don't know quite well about it.

Just like me, who has embarrassment when must to write an article to be included in this [Busby SEO Challenge](#) Blog. To be honest, it's two different things between following SEO Contest and the ability to write. Following **SEO Contest** is interesting, moreover for a newbie like me. But in the other side, writing an article is something scared. It seems I must be more creative.

Is the answer was copying and paste?

Ha..ha..ha.. That's not creative. Perhaps, in real world, copy-paste is easy to do and hard to be caught, but not in internet. Conditions are different with real world, easy to work out and also easy to be caught. Even if you want to copy-paste from the internet for the internet, you must be "linuwih" (purposely written in Jawa language in order that team from France, Philippines, and from India get their curiosity) , so our great grandfather, Google not read it as duplicate content.

How to get the ability of "linuwih"?

He..he... to get the ability of "linuwih", probably there is nothing wrong if you try to search in Google, just put the keyword "Mbah Maridjan" (without double quote). There you'll find a lot of information regarding to Mbah Maridjan.

Ok, if you have found a lot information about Mbah Maridjan, just read it all first. I'm sure, after you finished read it, some will find the answer and some will keep confused how to get the ability of "linuwih". If you still can't get the "linuwih" ability for copy-paste, try another keyword in Google, try to search keyword soekarno or keyword soeharto. Both of them are one of Indonesian developing magnate. Both are the "linuwih" Guru, and they are really good at "linuwih".

In Google, I'm sure you'll find a lot of information about the late of them. Just like the search of Mbah Maridjan, just read some articles about Soekarno and Soeharto. When you finished, I'm sure you'll have increased ability. And because now you have more ability than you ever imagine before, you'll forget about content's copy-paste. With a little wider horizon, you have much more resource as your creative idea to write your own original content.

Remember, search engine really loves originality. Original is unique, and Google is eccentric. Let them both unite as a great couple.

Ha...ha... gotcha...!!!

Note: Alhamdulillah, finally I wrote long enough to have a post in this [Busby SEO Challenge](#) site, whereas at the beginning I confused what should I wrote.
